Boonies Women's Size Guide Tips:

We sell Boonies based on the US shoe sizes so please find the corresponding US shoe size to match your foot measurements.

Boonies boots are a snug fit so please ensure you measure your feet before purchasing. The Boonies design is contoured to the foot for ultra-comfort. Beginning with a roomy toe box, the last is wider through the forefoot, supportive in the arch, and narrows in the heel. This combination accommodates a greater range of widths and lengths, superseding the need for half sizes and widths.

Finding the right Boonies Size for you:

Measure the length of your foot then add 5mm to it to get your Boonies foot measure.

If you are a ½ size, we recommend that you move up to the next full size to allow proper air flow.

Don't forget - THICK SOCKS! - If you are going to be wearing thick socks with your Boonies it might be a good idea to move up a size if you are borderline with your foot measure size.
